

# MOSFET – Power, Dual, N-Channel, $\mu$ Cool, UDFN6, 2.0x2.0x0.55 mm 30 V, 7.3 A

## NTLUD4C26N

### Features

- UDFN Package with Exposed Drain Pads for Excellent Thermal Conduction
- Low Profile UDFN 2.0 x 2.0 x 0.55 mm for Board Space Saving
- Ultra Low  $R_{DS(on)}$
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

### Applications

- Power Load Switch
- Wireless Charging
- DC-DC Converters

### MAXIMUM RATINGS ( $T_J = 25^\circ\text{C}$ unless otherwise stated)

| Parameter                                                         |              |                          | Symbol         | Value      | Unit             |
|-------------------------------------------------------------------|--------------|--------------------------|----------------|------------|------------------|
| Drain-to-Source Voltage                                           |              |                          | $V_{DSS}$      | 30         | V                |
| Gate-to-Source Voltage                                            |              |                          | $V_{GS}$       | $\pm 12$   | V                |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. Surface Mounted on FR4 Board using 1 in sq pad size (Cu area = 1.127 in sq [2 oz] including traces).
2. Surface-mounted on FR4 board using the minimum recommended pad size, 2 oz. Cu.

| Output Capacitance           | $C_{OSS}$    |                                                     |  | 225  |     |    |
| Reverse Transfer Capacitance | $C_{RSS}$    |                                                     |  | 27   |     |    |
| Total Gate Charge            | $Q_{G(TOT)}$ | $V_{GS} = 4.5$ V, $V_{DS} = 10$ V;<br>$I_D = 5.0$ A |  | 5.0  | 8.0 | nC |
| Total Gate Charge            | $Q_{G(TOT)}$ | $V_{GS} = 4.5$ V, $V_{DS} = 15$ V;<br>$I_D = 5.0$ A |  | 5.5  | 9.0 | nC |
| Threshold Gate Charge        | $Q_{G(TH)}$  |                                                     |  | 0.55 |     |    |
| Gate-to-Source Charge        | $Q_{GS}$     |                                                     |  | 2.5  |     |    |
| Gate-to-Drain Charge         | $Q_{GD}$     |                                                     |  | 1.1  |     |    |

### SWITCHING CHARACTERISTICS, $V_{GS} = 4.5$ V (Note 6)

|                     |              |                                                                         |  |     |  |    |
|---------------------|--------------|-------------------------------------------------------------------------|--|-----|--|----|
| Turn-On Delay Time  | $t_{d(ON)}$  | $V_{GS} = 4.5$ V, $V_{DD} = 15$ V,<br>$I_D = 5.0$ A, $R_G = 1$ $\Omega$ |  | 5   |  | ns |
| Rise Time           | $t_r$        |                                                                         |  | 15  |  |    |
| Turn-Off Delay Time | $t_{d(OFF)}$ |                                                                         |  | 13  |  |    |
| Fall Time           | $t_f$        |                                                                         |  | 1.7 |  |    |

### DRAIN-SOURCE DIODE CHARACTERISTICS

|                       |          |                                  |                           |  |     |     |   |
|-----------------------|----------|----------------------------------|---------------------------|--|-----|-----|---|
| Forward Diode Voltage | $V_{SD}$ | $V_{GS} = 0$ V,<br>$I_S = 2.0$ A | $T_J = 25^\circ\text{C}$  |  | 0.7 | 1.0 | V |
|                       |          |                                  | $T_J = 125^\circ\text{C}$ |  | 0.6 |     |   |

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

5. Pulse Test: pulse width  $\leq 300$   $\mu$ s, duty cycle  $\leq 2\%$ .

6. Switching characteristics are independent of operating junction temperatures.

**onsemi** and **onsemi** are trademarks of Semiconductor Components Industries, LLC dba **onsemi** or its subsidiaries in the United States and/or other countries. **onsemi** reserves the right to make changes without further notice to any products herein. **onsemi** makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. **onsemi** does not convey any license under its patent rights nor the rights of others.

**onsemi**, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). **onsemi** reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and **onsemi** makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using **onsemi** products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by **onsemi**. "Typical" parameters which may be provided in **onsemi** data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. **onsemi** does not convey any license under any of its intellectual property rights nor the rights of others. **onsemi** products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use **onsemi** products for any such unintended or unauthorized application, Buyer shall indemnify and hold **onsemi** and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of the part. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
