

F1B1-303010 F1B1-303012 F1B1-303015

Unshielded SMD Power Inductors

Signal Transformer is introducing the beginning of a new family of low-profile unshielded surface mount power inductors with the release of the first of three series, F1B1-303010/303012/303015. Height profiles of 1.0 mm to 1.5 mm, small footprints of 3.0 mm x 3.0 mm and broad range of inductance and current ratings, make them ideal for a wide range of applications.

Power inductors are an essential component in the voltage regulator topology. Virtually every circuit that regulates power in automobiles, electronics and DC-DC converters requires an inductor.

Compared to the shielded construction (in the same dimension, inductance value), the unshielded power inductor has a higher current carry capacity (higher saturation current rating) and suitable for price-sensitive or uncritical applications for low power circuits, general purpose power choke or power supply applications.

Unshielded power inductors are used in electrical power and electronic devices for these major purposes: Choking, blocking, attenuating, or filtering/smoothing high frequency noise in electrical circuits. Storing and transferring energy in power converters (DC-DC or AC-DC)

General Features

- Unshielded construction
- Surface mount
- Copper base with DR core
- Reduced size (small footprint) & weight
- Low Profile
- High current
- Automated process

Specifications

- Inductance Range: 1.0 μ H to 39 μ H
- Saturation Rated Current: 0.38 A to 2.3 A
- Temperature Rise Current: 0.33 to 1.9 A
- Operating Temperature Range: -40°C to +105°C (Including coil self-temperature rise)
- Storage Temperature Range (component): -40°C to +125°C

Applications

- Input/Output of DC-DC converters
- Power Supplies
 - Portable communication equipment
 - Camcorders
 - LCD TV's
- Mobile phones
- Digital Equipment
- Low pass frequency noise filters
- EMI noise filters

F1B1-303010/303012/303015 Series Datasheet

PRODUCT IDENTIFICATION

F1B1 - 303012 - 220 M

Type / Product Series

F1B1 = Unshielded SMD Power Inductors

Dimensions

303010 = 3.0 x 3.0 x 1.0 mm

303012 = 3.0 x 3.0 x 1.2 mm

303015 = 3.0 x 3.0 x 1.5 mm

Inductance *

220 = 22 μ H

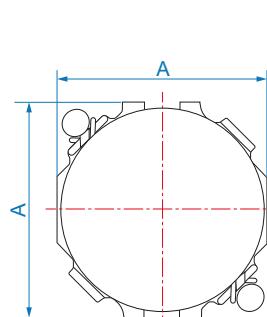

* Note: Expressed by three figures. The unit is micro henry (μ H). The first and second figures are significant digits, the third figure expresses the number of zeros which follow the two figures.

If there is a decimal point, it is expressed by the capital letter "R" (3R8 = 3.8 μ H). In that case, all figures are significant digits.

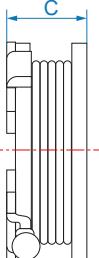

MECHANICAL SPECIFICATIONS

Dimensions are in mm.

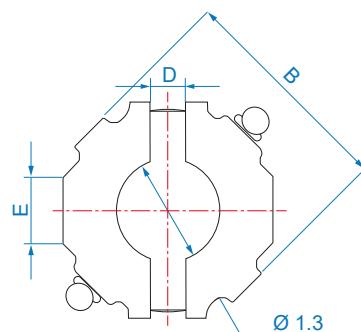

SERIES	A	B	C Max	D	E	F	G	H
F1B1-303010	3.0 ± 0.2	3.2	1.0	0.5	1.0	1.0	1.0	3.0
F1B1-303012	3.0 ± 0.2	3.2	1.2	0.5	1.0	1.0	1.0	3.0
F1B1-303015	3.0 ± 0.2	3.2	1.5	0.5	1.0	1.0	1.0	3.0

RECOMMENDED REFLOW SOLDERING CONDITIONS

- **ADD**

The recommended reflow conditions as above graph, is set according to our soldering equipment. Since various manufactures may have different reflow soldering equipment, products, process conditions, set methods, etc., when setting the reflow conditions, please adjust and confirm according to users' environment/equipment.

- **Notice**

- Solder reflow temperature: +250°C max. for maximum 10 seconds
- It is not recommended to solder inductors by soldering iron
- Please contact us for details

Custom versions available upon request.

About Signal Transformer

Signal Transformer is known as the world's leader of wire wound magnetic solutions since 1959. With over 50 years of experience manufacturing transformers, chokes, inductors and custom or modified standard products. Signal offers not only the most comprehensive line of certified standard power conversion products, with our vast engineering, manufacturing and regulatory resources; Signal Transformer excels in the design and manufacturer of cost effective, specialized platforms.
