Notes:

- $R_{\theta JA}$ is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. $R_{\theta JC}$ is guaranteed by design while $R_{\theta CA}$ is determined by the user's board design.

b) 125°/W when mounted on a .02 in² pad of 2 oz copper

c) 135°/W when mounted on a minimum pad.
