

1.27mm Pitch Connector

FX1 Series

DIN duplex density mount has been achieved.
(DIN 96 contacts and FX1 192 (96x2))

Photo 1

■Features

1. High density and space saved-DIN Duplex Mount Achieved

The alignment of the mating area in 4-row allows to duplex the number of contacts in the nearly equivalent mount square as for the conventional DIN connector.(Refer to photo (1).)

2. High Current and High Voltage

Two-thirds of total contact numbers are used for half pitch signaling contact, while the other one-third thereof is used for the power ground contact. Power ground contact corresponds to high current (1A) and high voltage (250V).

3. Sequence Structure

Considering insertion/extraction in active power mode and maintenance on the end user side, the FX1 series is designed in a mechanism that can afford the time different contact at two steps. (For details, refer to Figure (2) as shown on the right.)

4. Mis-insertion Prevent

Provide the insertion guide on both ends of connector, and widen an inductive area in order to prevent mis-insertion.

Sequence Structure (Pin contact sequence)

Figure 2

*FX1 Series (2 step sequence)

1	Row B
2	Row A, row C

Setting row B to ground, if active cable insertion and extraction are performed as power supply, arc will occur between contact and contact. The row B contact structure is constructed to separate arc occurrence point a and normal contact point b, and minimizes affects on the contact.

■Product Specifications

Rating	Current rating	Voltage rating	Operating Temperature Range-55 to 85°C (Note 1) Operating Humidity Range 40 to 80%	Storage Temperature Range -10 to +60°C(Note 2) Operating Humidity Range 40 to 70%(Note 2)
	Signal Contact: 0.5A	Signal Contact: 125V AC		
	Power Supply Contact: 1A	Power Supply Contact: 250V AC		

Item	Specification	Condition
1. Insulation Resistance	1000M ohms min.	250V DC
2. Withstanding Voltage	No flashover or insulation breakdown.	1 minute Signal contact 300V AC Power supply contact 600V AC
3. Contact Resistance	60m ohms max. (conductor resistance included)	100mA
4. Vibration	No electrical discontinuity of 1μs or more	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.
5. Humidity (Steady state)	Contact resistance: 70m ohms max. Insulation resistance: 1000M ohms min.	96 hours at temperature of 40°C and humidity of 90% to 95%
6. Temperature Cycle	Contact resistance: 70m ohms max. Insulation resistance: 1000M ohms min.	(-55°C: 30 minutes→15- to 35°C: 5 minutes max.→ 85°C: 30 minutes→15- to 35°C: 5 minutes max.) 5 cycles
7. Durability (Mating/un-mating)	Contact resistance: 70 m ohms max.	500 cycles

Note 1: Includes temperature rise caused by current flow.
Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.
Note 3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

■Material

●FX1 Series

Parts		Material	Finish	Remarks
Insulator	Header	PPS	Black	UL94V-0
	Receptacle	PPS/ PTB		
Contact	Straight header	Brass	Contact area:Tin plated Lead area:Tin plated	_____
	Right angle header	Phosphor bronze		
	Receptacle	Phosphor bronze		
Prefixed pin		Phosphor bronze	Tin plated	_____

Precautions

1. Soldering

- (1) In the case of manual soldering, complete services under the condition of soldering iron bit temperature below 360°C for 5 seconds max. Please be sure to coat the contacts with solder so that no force is given.
- (2) In the case of dip soldering bath, complete service under the condition of soldering iron bit temperature below 260°C for 10 seconds max.

2. Prefixed function

If the prefixed function is required, please use to the board prefixed pin type.
