Enabling the Electronics Revolution

PS2P-ARC

Play Resistant Arc Position Sensor

True touchless operation

Without any internal or external gears or linkages the sensor is easily assembled and calibrated and free from wear and tear over lifetime.

Immune to radial and axial play Maintains stable electrical output and

specified linearity despite radial and axial tolerances avoiding performance loss and maintenance cost.

Made for harsh environments

IP69K sealing, high operating temperature range as well as shock and vibration resistance allow the use in the most demanding environments.

Compact and low profile package

Without the need for a shaft the sensor is provided in a exceptionally compact and low profile package that fits in space contraint applications.

Unlimited mechanical life

The separation of electronics and magnet module allows for a virtually unlimited lifetime independent of number of revolutions.

PIHER sensing systems

Adaptable to your requirements

Custom mechanical design, programmable transfer function and switch outputs as well as different output protocols and redundancy levels available.

DESCRIPTION

Piher Sensing Systems' PS2P-ARC position sensor creates immunity to radial and axial play on pivot joints where misalignment result in poor operational performance and labor intensive maintenance programs.

The magnet is attached to the rotating parts of a pivot joint and the electronics module to the chassis (or vice versa). Without the need for any gears or linkages the sensor is easy to mount thereby delivering additional cost reduction on the production line and improving product reliability and durability during its lifetime.

The PS2P-ARC measures changes in position relative to the sensor by detecting the movement of a sinusoidal magnetized arc magnet that is located in a separate housing and is only sensitive to the flux density co-planar with the IC surface.

The PS2P series is complemented by touchless linear (PS2P-LIN) and angular (PS2P-CON) position sensors. All sensors of the series will deliver the same level of precision and stability throughout their lifetime as on the first day they are installed despite extremes of vibration, shock, temperature and contamination. As absolute sensors they will not loose the values even after a power failure.

APPLICATIONS

Off-Highway

- Tractor hitch position
- Boom loader position
- Excavator bucket position
- ► Telehandler position
- Forklift height and tilt
- Articulated vehicles pivot joint position

Automotive

Active suspension

Marine

- ▶ Marine steering and throttle control
- ▶ Hydraulic arm position

Industrial

Robotic arm position

Play Resistant Arc Position Sensor

MECHANICAL SPECIFICATIONS

Life	Virtually unlimited
Air gap	2mm ±1mm
Magnet radius	23mm (Model M009) 31mm (Model M008)

ELECTRICAL SPECIFICATIONS

Linearity ¹	Analog, PWM CAN	±1% absolute (±0.5% upon request) ±3 degrees absolute			
Angular range ²		110 degrees 90 degrees 45 degrees			
Output protocol ³		Analog (Ratiometric) PWM CAN Open CAN SAE J1939			
Output function	Standard Inverted Redundant	10% to 90% Vdc (CW) 90% to 10% Vdc (CCW) 10% to 90% Vdc (CW and CCW)			
Switch		Programmable on request			
Resolution		Up to 12 bit			
Supply voltage	Analog and PWM CAN	5V ±10% 7V to 15V (25V on request) 7V to 32V			
Supply current	Single version Redundant version CAN version	Typ 8.5 mA Typ 17 mA Typ 47 mA			
Voltage protection		±10V			
Self-diagnostic features		Yes			

1 Results may vary depending on the ferromagnetic environment. Contact Piher for further support.

2 Other electrical rotational angles on request. 3 CAN protocol available for simple output versions only.

ENVIRONMENTAL SPECIFICATIONS

Operating and storage temperature ¹	Analog, PWM CAN	-40°C to +125°C -40°C to +85°C	
Shock		50g	
Vibration		10-2000 Hz; 10g; A _{max} 0,75 mm	
Sealing		IP67, IP69K	

¹Other specifications available.

CONNECTION SCHEME

Color	Simple output		Redundant output		Full-redundant	CAN
	5V	7V to 15V	5V	7V to 15V	output	
Brown	Power supply	Power supply	Power supply	Power supply	Power supply 1	Power supply
Blue	Ground	Ground	Ground	Ground	Ground 1	Ground
Black	Signal output	Signal output	Signal output 1	Signal output 1	Ground 2	CAN High
White	n/a	n/a	Signal output 2	Signal output 2	Signal output 2	CAN Low
Red	n/a	n/a	n/a	n/a	Power supply 2	n/a
Yellow	n/a	n/a	n/a	n/a	Signal output 1	n/a
Grey	n/a	Not used	n/a	Not used	n/a	n/a

More instructions of use on www.piher.net. Connector assembly available on request.

Play Resistant Arc Position Sensor

Play Resistant Arc Position Sensor

DIMENSIONS (MM)

Magnet M008 (31mm radius)

Magnet shown in 0° degree position.

Amphenol Sensors

Play Resistant Arc Position Sensor

OUTPUT CURVE

ERA: Electrical Rotational Angle. Custom output functions available on request.

APPLICATION EXAMPLES

To Active Suspension System (Torsion Bar)

Tractor Rear Hitch Position

Marine Outboard Steering

Please always use the latest updated datasheets and 3D models published on our website.
